
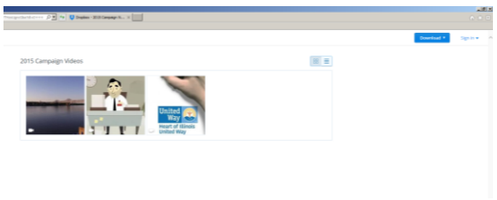
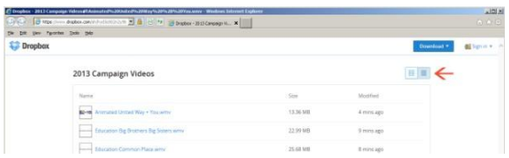
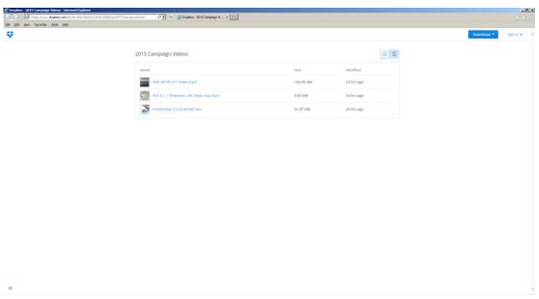
If you have a Dropbox account you can sign-in, if you don't have an account or do not want to create an account, you can just click on the "X" in the upper right corner of the sign-up box.



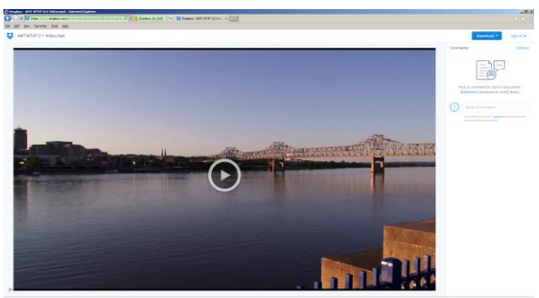
After you sign-in or opt-out of the sign-up box, it will take a few minutes for the video thumbnails to pop-up.



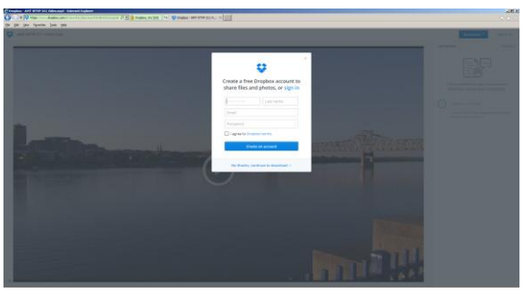
Change the file menu from a grid of icons to a listing (so you can see the video file names) See the red arrow above.



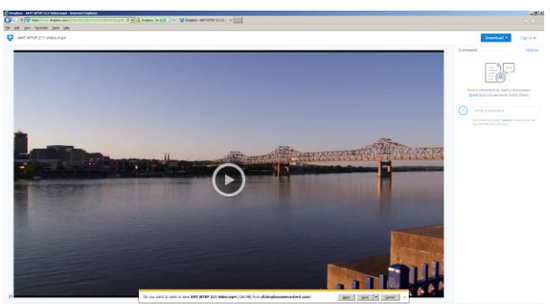
Click on the filename for the video you want to view/download.



Click on the blue Download button in the upper right corner and choose direct download to save to your hard drive.



If you don't have a Dropbox account, click on "No Thanks, Continue to Download"



This may take a few minutes to load, but your internet browser will bring up its default download menu (could look different than shown at the bottom of the image at left). Choose Save. The file will save to your default download file.
